

Seamless, Secure Onboarding

The Problem

Remote identity verification is crucial to ensuring organizations are interacting with the right people online. The challenge is to make digital onboarding accessible and usable without compromising security.

Use Cases

Financial Services

Creating an online account

Government

Enrolling in online services

Healthcare

Registering for account services

Workforce

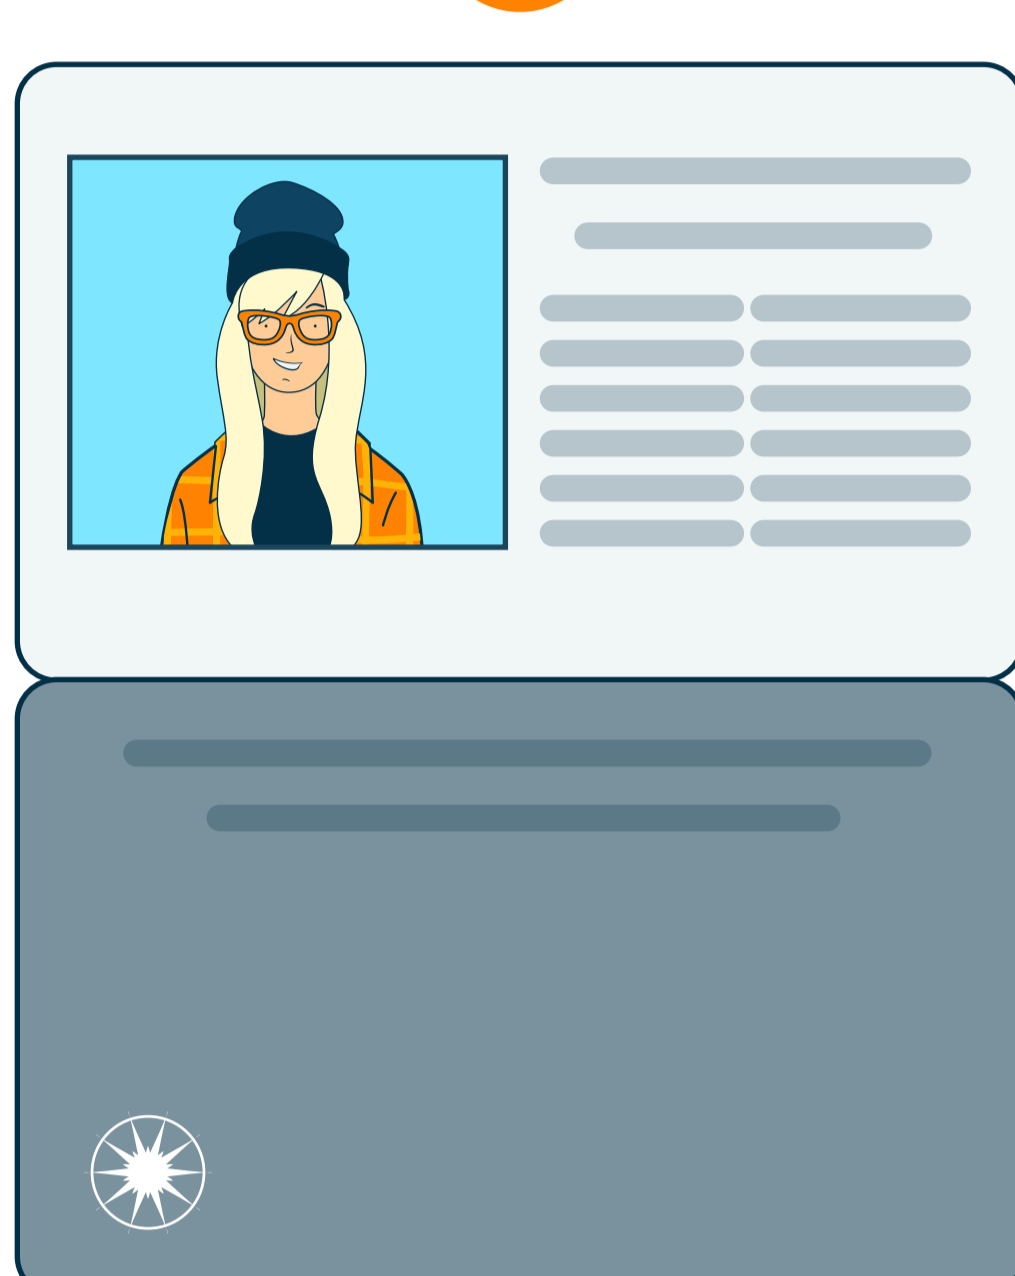

Onboarding remote partners and employees

The Solution

iProov Remote Onboarding delivers science-based biometric verification with a simple selfie and ID capture. The fully automated process is designed to drive conversions while maximizing security, delivering flexible levels of identity assurance tailored to the use case and risk threshold.

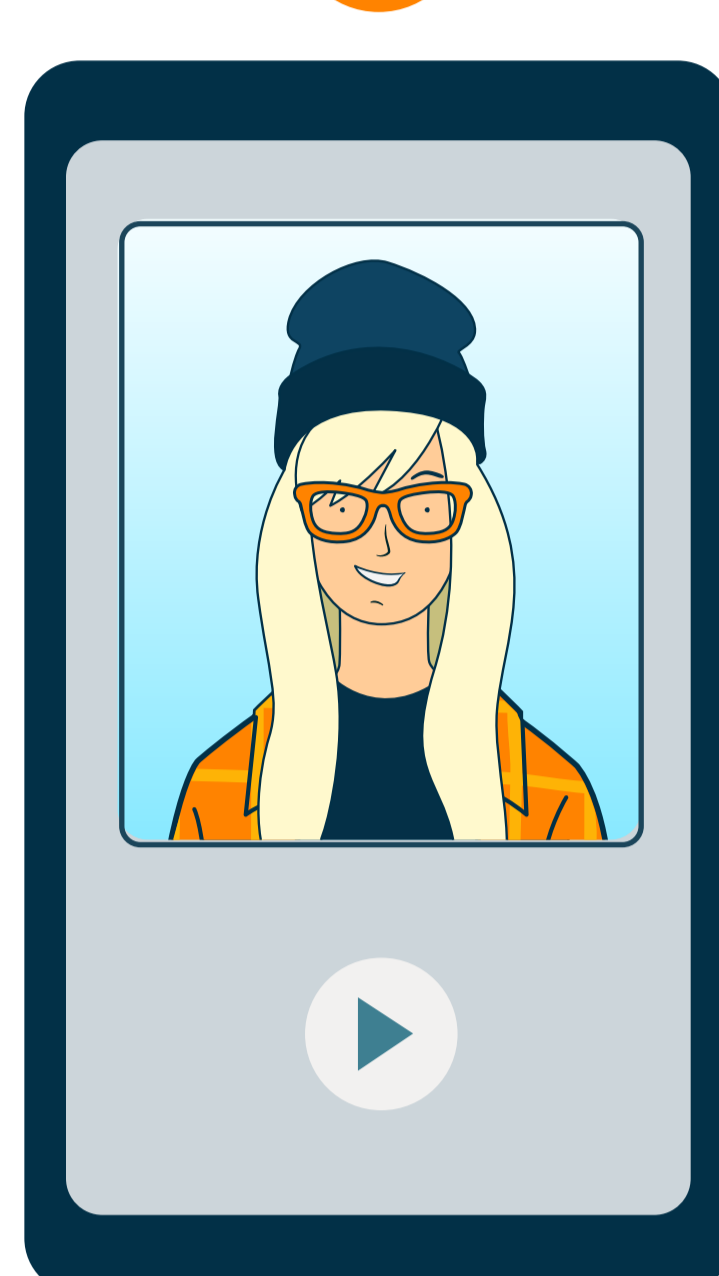

How It Works

1

Capture a Government-Issued Identity Document

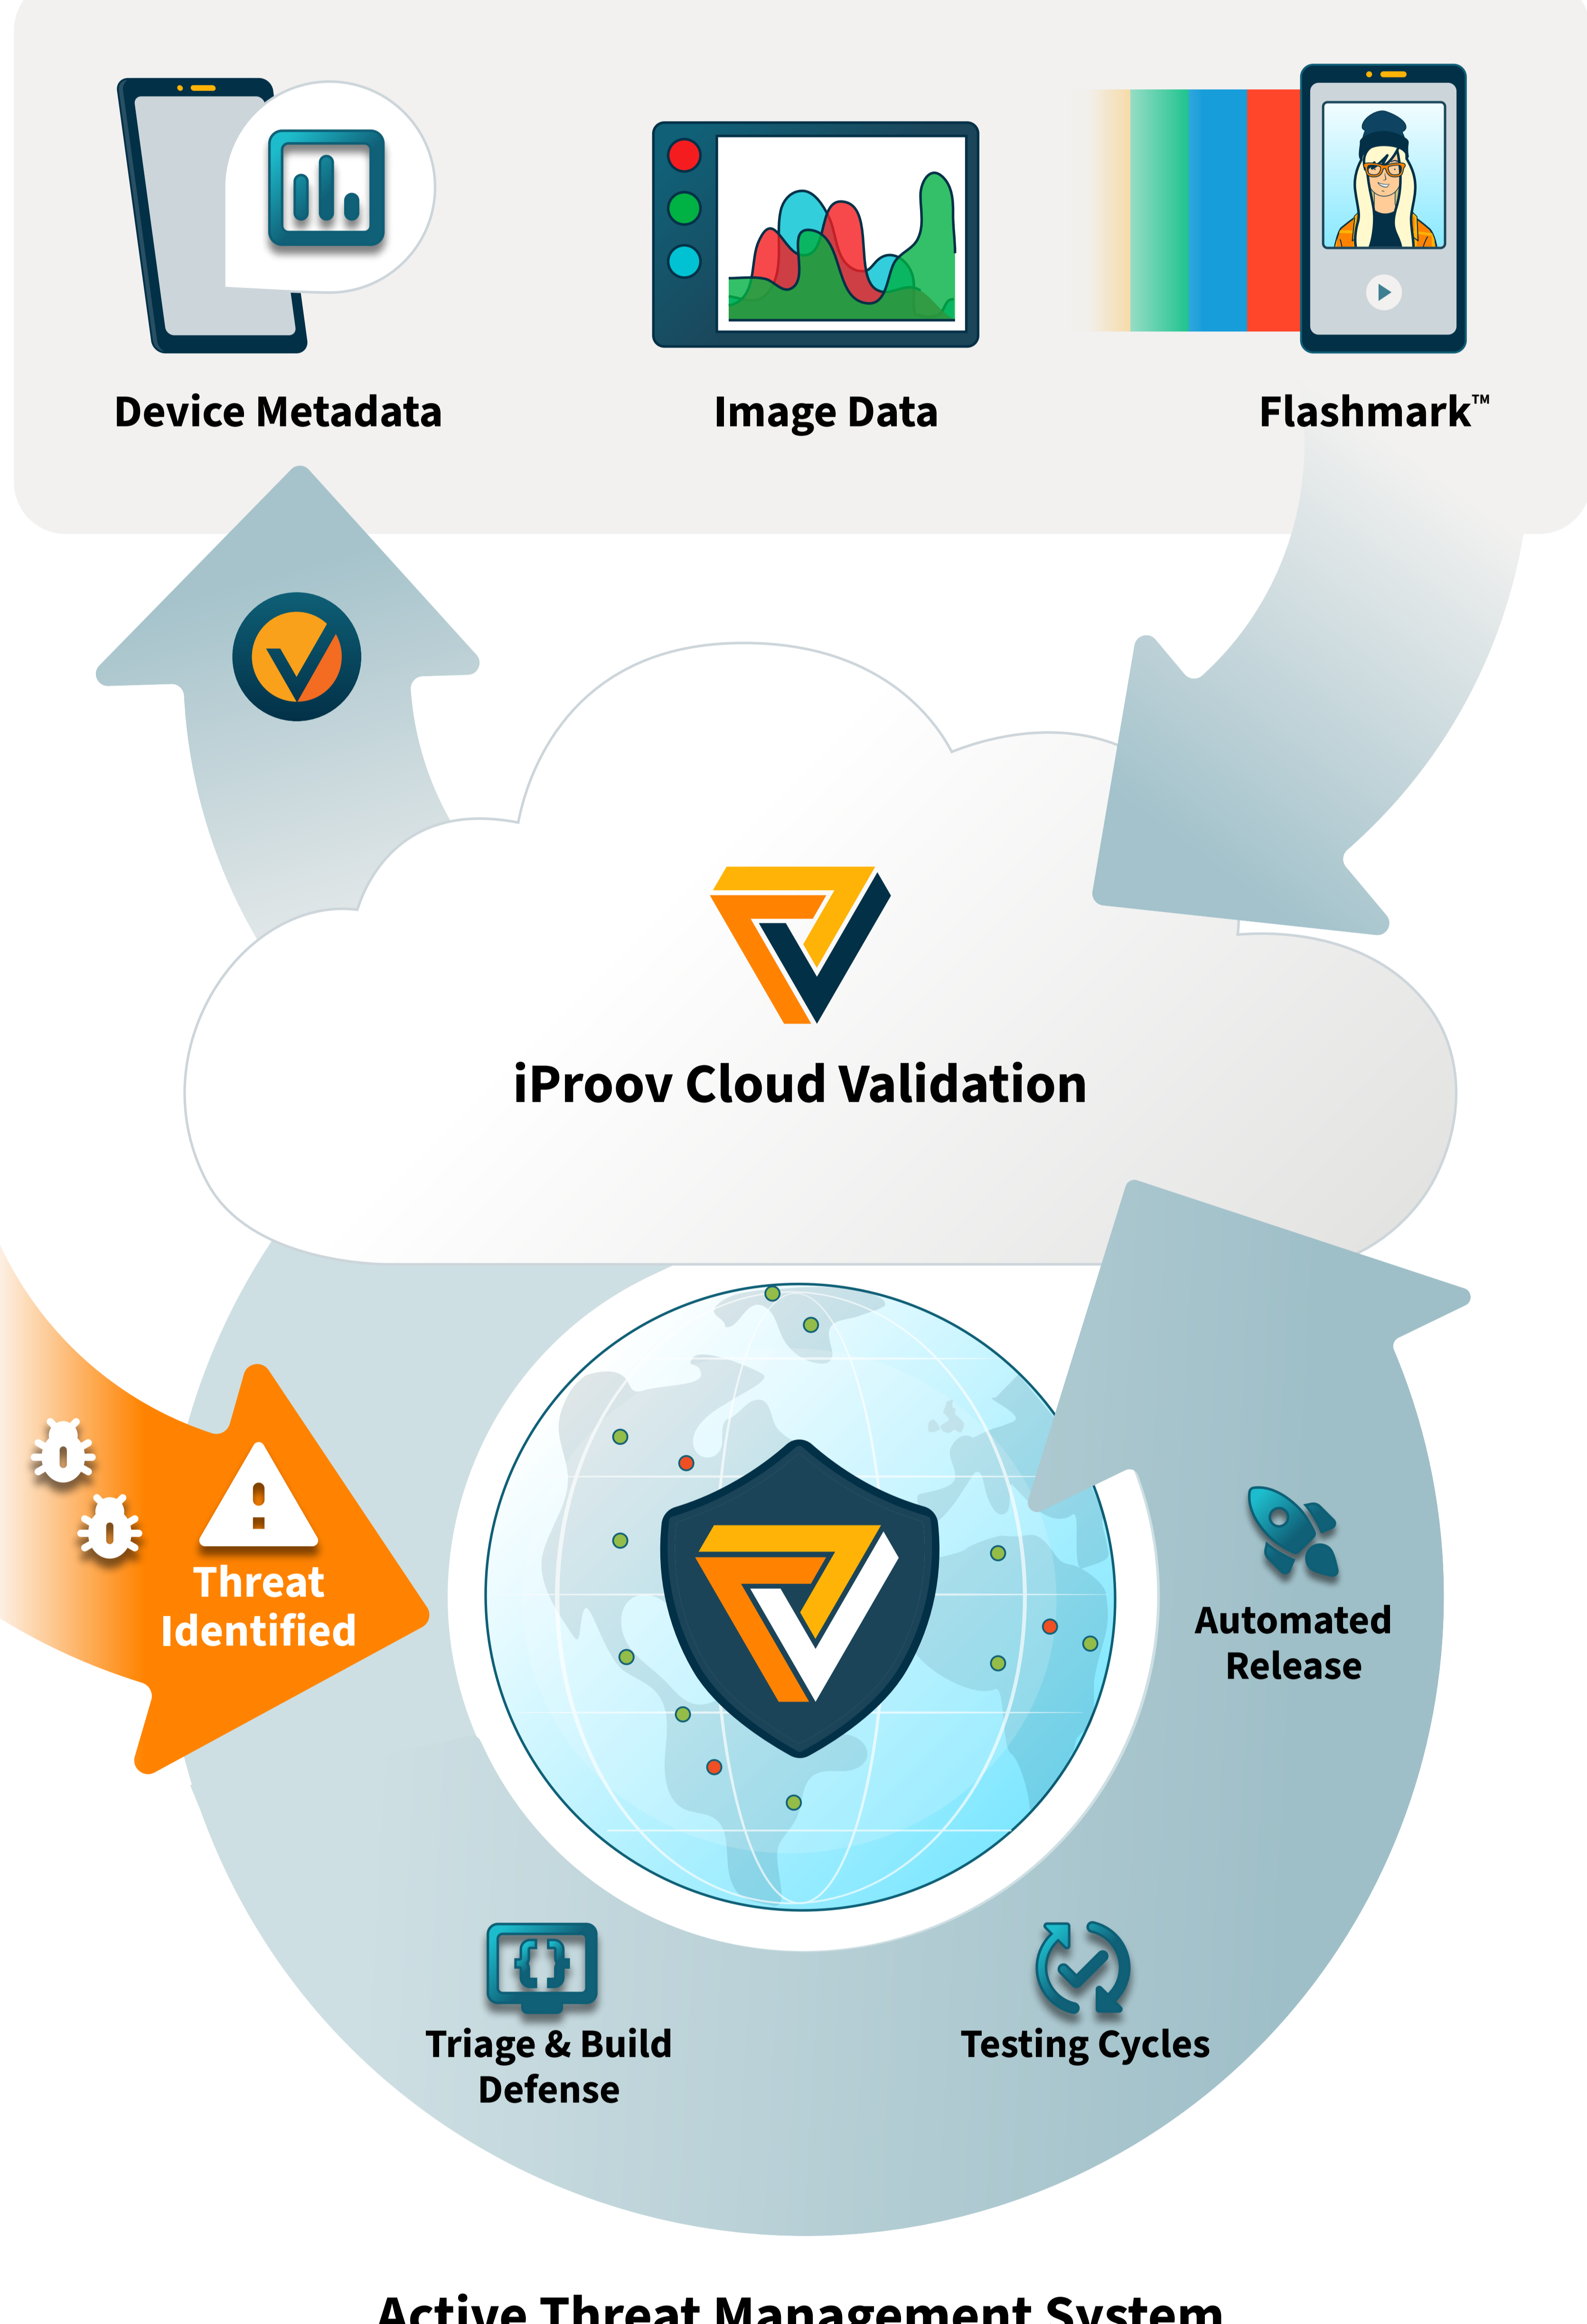

2

Capture a Selfie

Behind The Scenes

iProov uses sophisticated AI technology to make sure it's the **right person** (not an imposter), a **real person** (not a spoof), and they're authenticating in **real time** (they're not a deepfake).

Underpinning the solution is an active threat management system that identifies and responds to emerging threats across the globe. Continuous updates are delivered without disruption to the customer or end user to ensure organizations stay one step ahead of the evolving threat landscape.

Inclusive by Design

iProov Remote Onboarding conforms with Web Content Accessibility Guidelines (WCAG) 2.2 AA and Section 508 to promote inclusivity for people with cognitive or learning disabilities, physical disabilities, or visual impairments.

iProov algorithms are trained and tested against diverse, balanced datasets, and actively monitored in production environments to ensure consistent performance across age, gender, and skin tone.

The Result

iProov Industry-Leading Outcomes

98%
Completion Rates

1.2
Attempts to Pass

1-2
Seconds for Face Capture

Business Outcomes

Enhance the user experience

Increase conversion rates

Streamline processes

Reduce the cost of manual reviews

Reduce fraud

Reduce losses

Increase security and trust

Reduce cost of regulatory investigations

iProov is trusted by the world's most security-conscious organizations.
